## Work Experience

### Web Developer/Designer

11/2018 – Present

Freelance

- Designed a logo and created a website for a company called Open Mind Tutoring
- Used Adobe Illustrator for the logo and AdobeXD for the website layouts

### Computer Programming Instructor

10/2018 – 12/2018

Coding With Kids, Seattle, WA

- Taught elementary students the fundamentals of coding by creating games on scratch.mit.edu

### Web Development Internship

10/2018-11/2028

Explore.com

- Debugged minor issues with the site, both in the backend with PHP and the front-end as well
- Used Bitbucket to merge changes as well as pull down changes

## Projects

### Blackjack

Built a front-end web application for the game of blackjack using Vanilla JavaScript DOM manipulation.

### Good Market

This is an application where a user can buy and sell goods online. A seller can post an item and can then donate a percentage of their revenue towards a charity of their choice. The buyer can see what charity the seller selected. This project was built with a team of 3. As the Git master, I was in charge of merging the commits. I also played a major role in planning out the models, coding them out, and also contributed heavily to the CSS. This project was built with Python and Django.

### Social Network

Created a social network using the React framework. This includes a timeline for posting comments, a friends list, a photos section, and an about section. Currently using jsonplaceholder.com to populate the site by fetching with axios. React Router is used for navigating the site to optimize navigation speed.

## Education

### General Assembly – 2018

Web Development Immersive program involving the fundamentals of full stack web development with JavaScript as well as Object Oriented Programming with Python

### Edmonds Community College – Lynnwood, WA - 2013

Associate of Arts Degree: Business
